## **Your Own Virtual School**

## CURRENT TRENDS IN VIRTUAL SCHOOLING

The national trend toward online learning programs in public and private schools has reached a tipping point. Students and families demand flexibility and individualized learning, and this calls for the development of virtual school solutions for students all over the country.

### Macro Trends in Virtual Schooling and Online Learning

There are two primary reasons for deploying Virtual Schooling Systems:

1. Technology is more accessible and easier to use. Now online courses are available at all grade levels specifically designed for online delivery through multi-modal technology platforms and education management systems. These systems feature customizable back-end reporting that make administration of virtual programs easier than ever.
2. It used to be “black and white” - students attended a brick and mortar school and classroom. Now there are hybrid, blended, part-time virtual, and full-time virtual programs, and everything in between.

Virtual school options provide a myriad of benefits:

- » Complete school management;
- » A continuum of learning options for each student;
- » Strategic roles for all teachers;
- » True anytime/anywhere learning.

With limited time and resources, district or school administrators need a roadmap to evaluating, initiating, and implementing a virtual program for their students. You need answers to questions such as:

- » What does an online virtual school look like?
- » What does an online course and/class look like?
- » How do students interact with their teacher?
- » What qualifications and training are required of teachers?
- » What national or district school policies are needed to implement online learning?

## THE VIRTUAL SCHOOL SYSTEM

Our Adria Virtual School Management System is the ideal solution for schools and campuses that want an easy means to manage all their records. It is simple & easy to use for your teachers and embeds powerful features for your institution such as:

- » School Management
- » Teachers (HR) Management
- » Gradebook & Reports
- » Parent-Teacher collaboration
- » Timetable, attendance & scheduling
- » Online classroom and assignment

The Adria Virtual School system provides user-friendly dashboards with login access for teachers, non-teaching staff, students, parents and management personnel of your institution. The various modules available facilitate all the processes of your institution, from admission of new students to generating transfer certificates when students complete their studies.

The system also has a fully-fledged Human Resource module to manage the payroll and teacher pay slips.

Other outstanding functions that the Adria Virtual School features include:

- » Easy tracking of students;
- » Analyzing their performance and attendance;
- » Instant report generation;
- » As the entire data is online and secure, any analysis can be done at any desired point of time;
- » Easy User interface design makes using the system easier for school staff and students;
- » Highly customizable and easily customizable;
- » Built on powerful Ruby on Rails technology;
- » Custom Reports.
